

**Ik ben gestart met de files van sysadmin.** Als eerste heb ik de ubuntu versies moeten veranderen naar trusty32, heb de vorige keer ondervonden dat de 64 versie om een bizarre reden niet wil werken.

```
# Defines our Vagrant environment
#
# -*- mode: ruby -*-
# vi: set ft=ruby :

Vagrant.configure("2") do |config|

  # create mgmt node
  config.vm.define :mgmt do |mgmt_config|
    mgmt_config.vm.box = "ubuntu/trusty32"
    mgmt_config.vm.hostname = "mgmt"
    mgmt_config.vm.network :private_network, ip: "10.0.15.10"
    mgmt_config.vm.provider "virtualbox" do |vb|
      vb.memory = "256"
    end
    mgmt_config.vm.provision :shell, path: "bootstrap-mgmt.sh"
  end

  # create load balancer
  config.vm.define :lb do |lb_config|
    lb_config.vm.box = "ubuntu/trusty32"
    lb_config.vm.hostname = "lb"
    lb_config.vm.network :private_network, ip: "10.0.15.11"
    lb_config.vm.network "forwarded_port", guest: 80, host: 10000
    lb_config.vm.provider "virtualbox" do |vb|
      vb.memory = "256"
    end
  end

  # create some web servers
  # https://docs.vagrantup.com/v2/vagrantfile/tips.html
  (1..2).each do |i|
    config.vm.define "web#{i}" do |node|
      node.vm.box = "ubuntu/trusty32"
      node.vm.hostname = "web#{i}"
      node.vm.network :private_network, ip: "10.0.15.2#{i}"
      node.vm.network "forwarded_port", guest: 80, host: "1000#{i}"
      node.vm.provider "virtualbox" do |vb|
        vb.memory = "256"
      end
    end
  end
end
```

**Noot: trusty64 -> trusty 32 & poort aangepast naar 10000.**

**EDIT: host verandert naar 1230** (blijkbaar al een andere app op 10000)

We laten hiermee 4 servers starten, een managementserver voor ansible, een load balancer met HAProxy en 2 webserver.

```
Vagrant cannot forward the specified ports on this VM, since they
would collide with some other application that is already listening
on these ports. The forwarded port to 10000 is already in use
on the host machine.

To fix this, modify your current project's Vagrantfile to use another
port. Example, where '1234' would be replaced by a unique host port:

    config.vm.network :forwarded_port, guest: 80, host: 1234

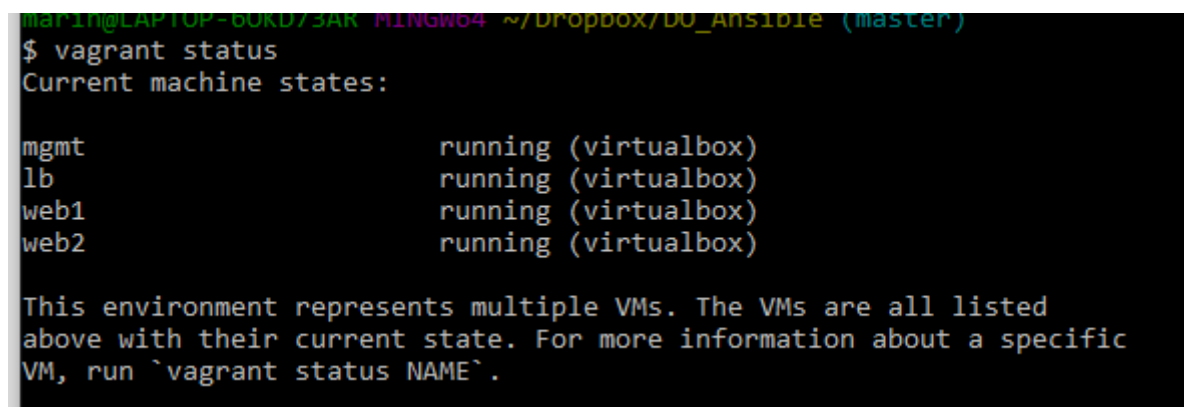

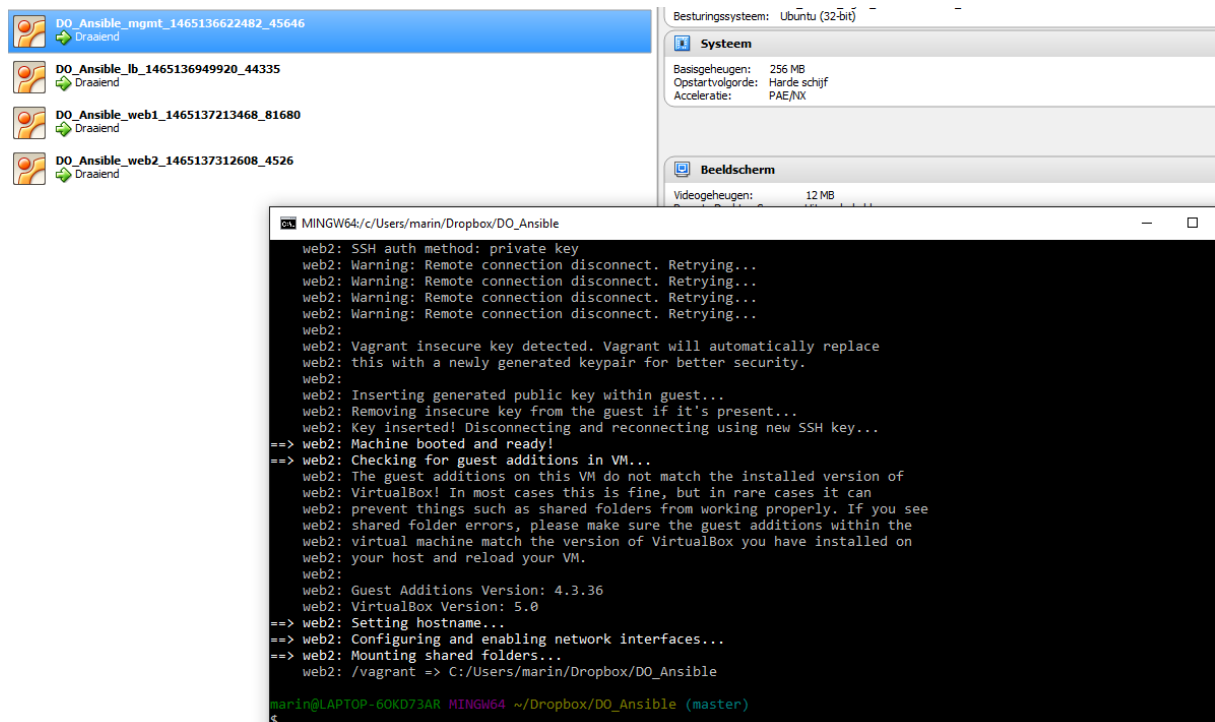

Sometimes, Vagrant will attempt to auto-correct this for you. In this
case, Vagrant was unable to. This is usually because the guest machine
is in a state which doesn't allow modifying port forwarding.
